

IMPLEMENTING A ROADMAP TO REDUCING CHILD POVERTY

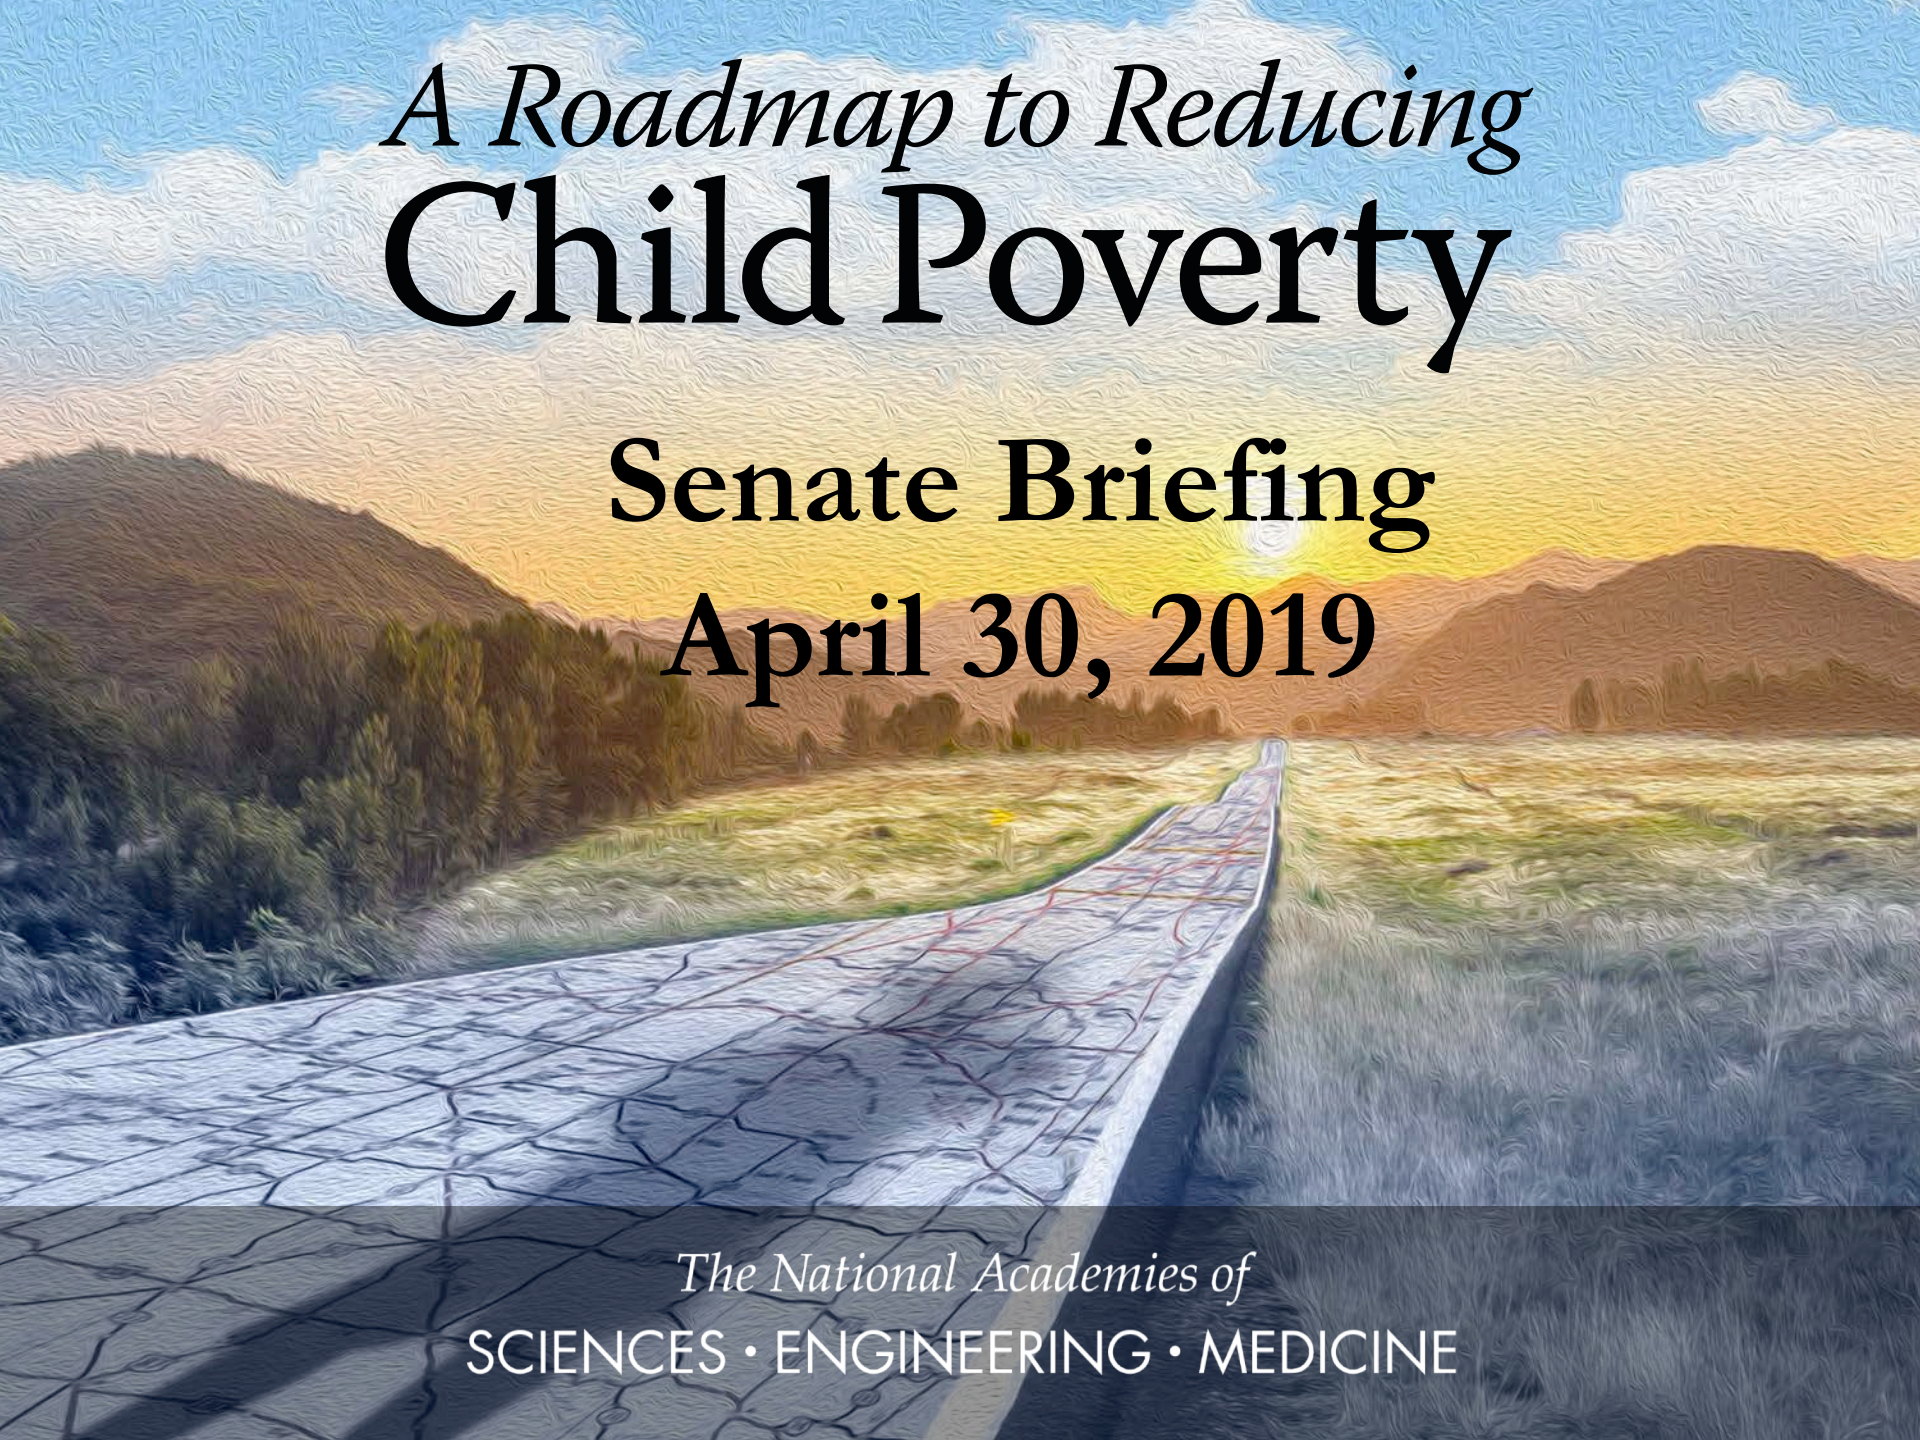

325 RUSSELL SENATE OFFICE BUILDING
KENNEDY CAUCUS ROOM
APRIL 30, 2019

American Academy
of Pediatrics

DEDICATED TO THE HEALTH OF ALL CHILDREN®

The background of the slide is a landscape painting. A long, straight road with a cracked surface leads from the foreground into the distance, vanishing towards a horizon. The road is flanked by grassy fields and hills. The sky is filled with soft, golden light, suggesting a sunset or sunrise, with a bright sun visible on the horizon. The overall style is painterly and evocative.

A Roadmap to Reducing
Child Poverty

Senate Briefing

Statement of Task

Review research on linkages between child poverty and child well-being

Analyze the poverty-reducing effects of existing major assistance programs directed at children and families

Provide a list of alternative evidence-based policies and programs that could reduce child poverty and deep poverty by 50% within 10 years

Impacts of Poverty on Child Well-Being

A landscape painting of a road at sunset. The road is paved and leads into the distance, flanked by grassy fields and mountains. The sun is low on the horizon, casting a warm glow over the scene. The sky is a mix of blue and yellow.

The National Academies of
SCIENCES • ENGINEERING • MEDICINE

Reviewed All Rigorous, High-Quality Research

- Growing up poor has negative effects on birthweight, brain development, and child physical and mental health
- Growing up poor leads to worse education and employment outcomes as adults
- Effects worse, the younger the child

A Dollar Figure on the Cost of Child Poverty

- \$800 million to \$1.1 trillion
- 4% of GDP
- Lost earnings, employment
- Increased costs of health care
- Costs of incarceration, assistance programs

Public Programs Can Help

- Rigorous research shows that SNAP, the EITC, and public health insurance improves child well-being in many dimensions

A landscape painting of a long, straight road stretching into the distance under a sunset sky. The road is paved and has a grid-like pattern of cracks. The sky is a mix of blue, yellow, and orange, with the sun low on the horizon. The background shows rolling hills and mountains.

Poverty Reducing Effects of Major Existing Assistance Programs

The National Academies of
SCIENCES • ENGINEERING • MEDICINE

Child Poverty in 2015

- Child Poverty: In a household whose income is below the government poverty line*
- 2015: 13% of U.S. children were in families with incomes below the poverty line
- 9.6 million children

*Supplemental Poverty Measure

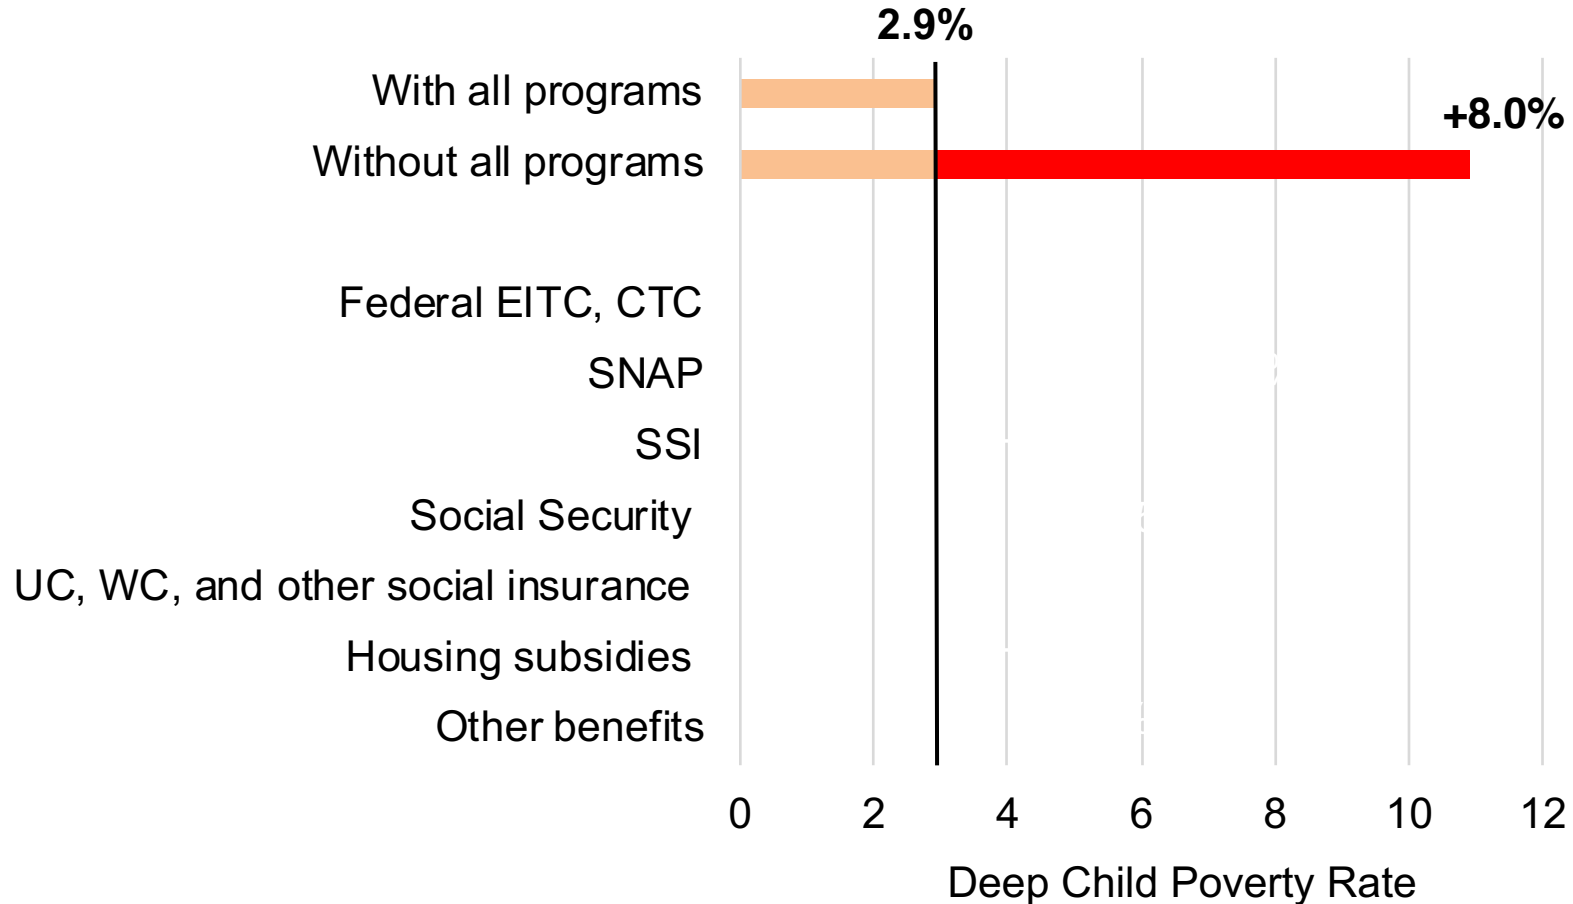

Child Poverty Rates Would Be Higher Without Existing Programs

Child Poverty Rates Would Be Higher Without Existing Programs

Deep Child Poverty Rates Would Also Be Higher Without Existing Programs

Deep Child Poverty Rates Would Also Be Higher Without Existing Programs

A landscape painting of a road at sunset. The road is paved and leads into the distance, flanked by grassy fields and mountains. The sun is low on the horizon, casting a warm glow over the scene. The sky is filled with soft, colorful clouds.

Program and Policy Options for Child Poverty Reduction

The National Academies of
SCIENCES • ENGINEERING • MEDICINE

The Committee Developed

20 individual policy and program options

4 policy and program “packages”

Simulated Programs and Policies

Program and policy options tied to work:

- Expand the Earned Income Tax Credit (EITC)
- Expand child care subsidies
- Raise the federal minimum wage
- Implement a promising training and employment program called WorkAdvance

Modifications to existing provisions relating to immigrants:

- Increasing immigrants' access to safety net programs

Modifications to existing safety net programs:

- Expand Supplemental Nutrition Assistance Program (SNAP)
- Expand the Housing Choice Voucher Program
- Expand Child Supplemental Security Income (SSI) levels

Policies used in other Countries:

- Replace Child Tax Credit with a nearly-universal child allowance
- Introduce a child support assurance program that sets guaranteed minimum child support amounts per child per month

Other programs considered but not simulated for lack of:

- **Evidence on effectiveness:**

- LARC (Long Acting Reversible Contraceptives)
- Mandatory Work Programs
- Marriage Promotion
- TANF
- Paid Family and Medical Leave
- Block Grants

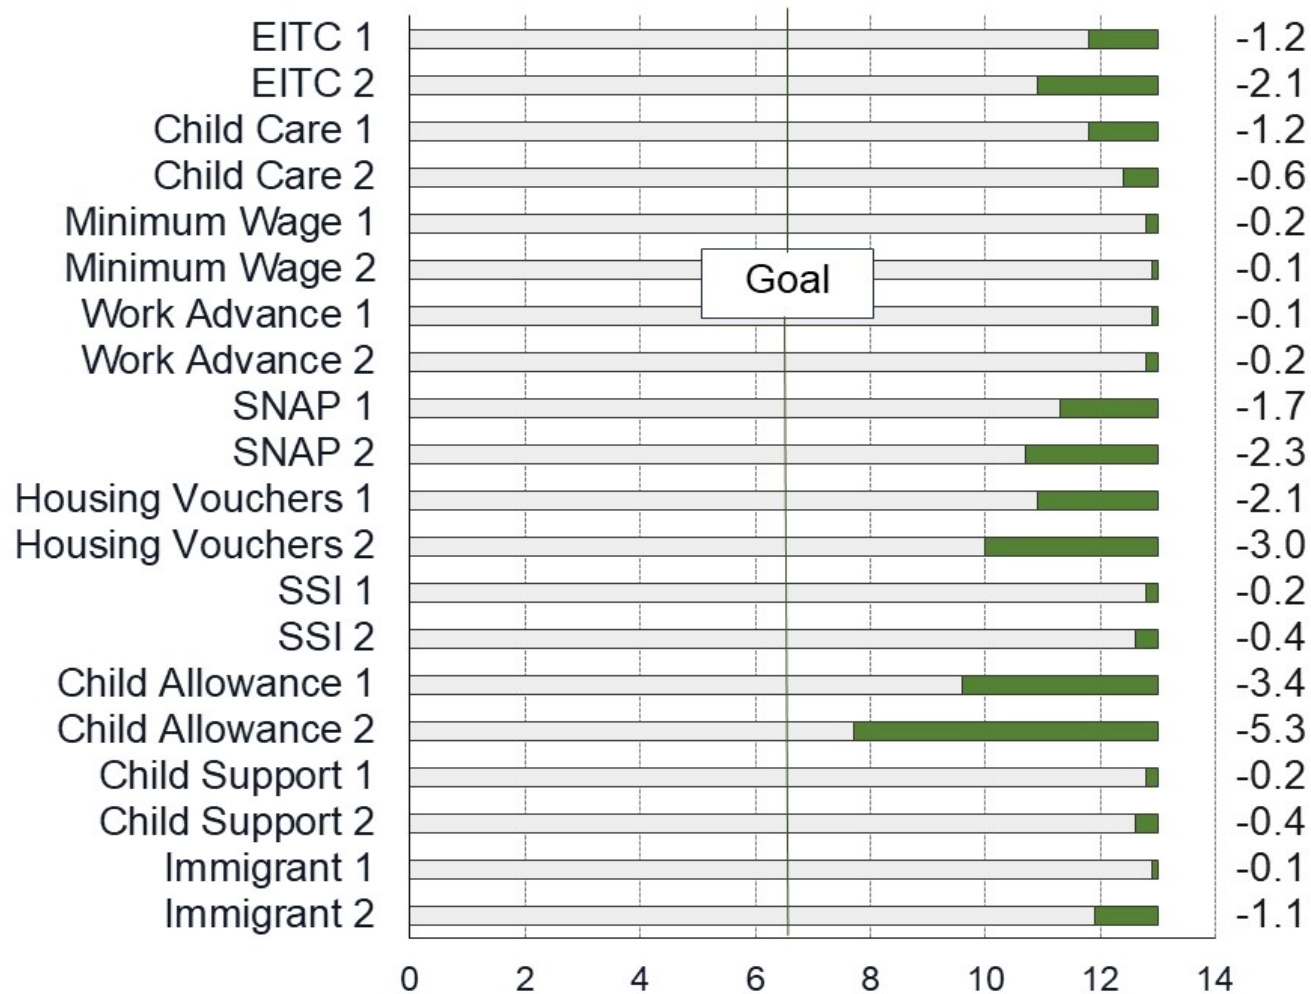

- **Data:**

- American Indian/Alaska Native

- **Comprehensive poverty measurement:**

- Public Health care programs (1/3 of federal expenditures on children)

No Single Program or Policy Option Met the 50% Reduction Goal

More Effective Policies Generally Cost More

Impacts on Employment

- Income support enhancements decreased employment by up to 160,000.
- Work-based enhancements (e.g., to EITC, CDCTC) increased employment by up to 550,000.

The Committee Developed

20 individual policy and program options

4 policy and program packages:
Combinations of programs to meet
different needs

The Idea of “Packages”

- Poor families have multiple needs
- Some need work support, some need housing support, some need food support, some just need cash assistance
- Many are in special situations
- Multiple programs (“packages”) may be better than single programs

Work-based Packages Failed to Meet the Goal

	Work-oriented package	Work-Based and Universal Support Package	Means-tested supports and work package	Universal supports and work package
Expand EITC	X			
Expand Child and Dependent Care Tax Credit	X			
Increase the minimum wage	X			
Roll out WorkAdvance	X			
Percent Reduction in the number of poor children	-18.8%			
Percent Reduction in the number of children in deep poverty	-19.3%			
Change in number of low-income workers	+1,003,000			
Annual cost, in billions	\$8.7			

Some Packages Met the Goal

	Work-oriented package	Work-Based and Universal Support Package	Means-tested supports and work package	Universal supports and work package
Expand EITC	X	X	X	X
Expand Child and Dependent Care Tax Credit	X	X	X	X
Increase the minimum wage	X			X
Roll out WorkAdvance	X			
Expand housing voucher program			X	
Expand SNAP benefits			X	
Begin a child allowance		X		X
Begin child support assurance				X
Eliminate 1996 immigration eligibility restrictions				X
Percent Reduction in the number of poor children	-18.8%	-35.6%	-50.7%	-52.3%
Percent Reduction in the number of children in deep poverty	-19.3%	-41.3%	-51.7%	-55.1%
Change in number of low-income workers	+1,003,000	+568,000	+404,000	+611,000
Annual cost, in billions	\$8.7	\$44.5	\$90.7	\$108.8

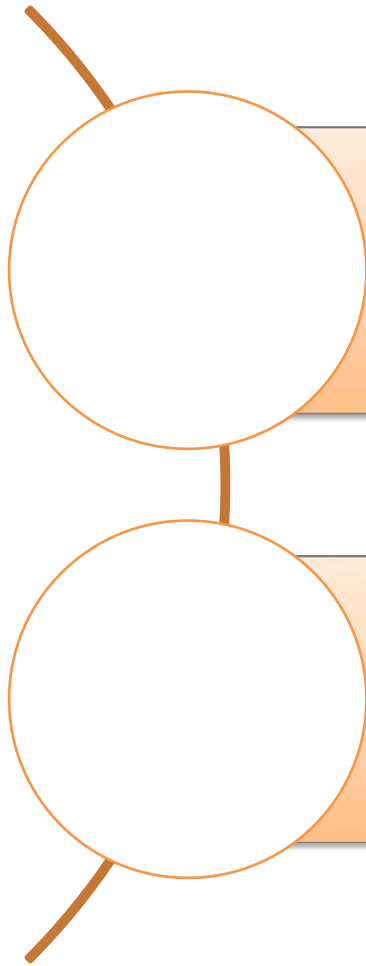

Costs of the Packages

Package costs range from \$8.7 billion to \$108.8 billion per year

Studies have estimated the annual macro costs of child poverty to range from \$800 billion to \$1.1 trillion (4% of GDP)

Lessons From the Packages:

Individual policy and program changes are insufficient

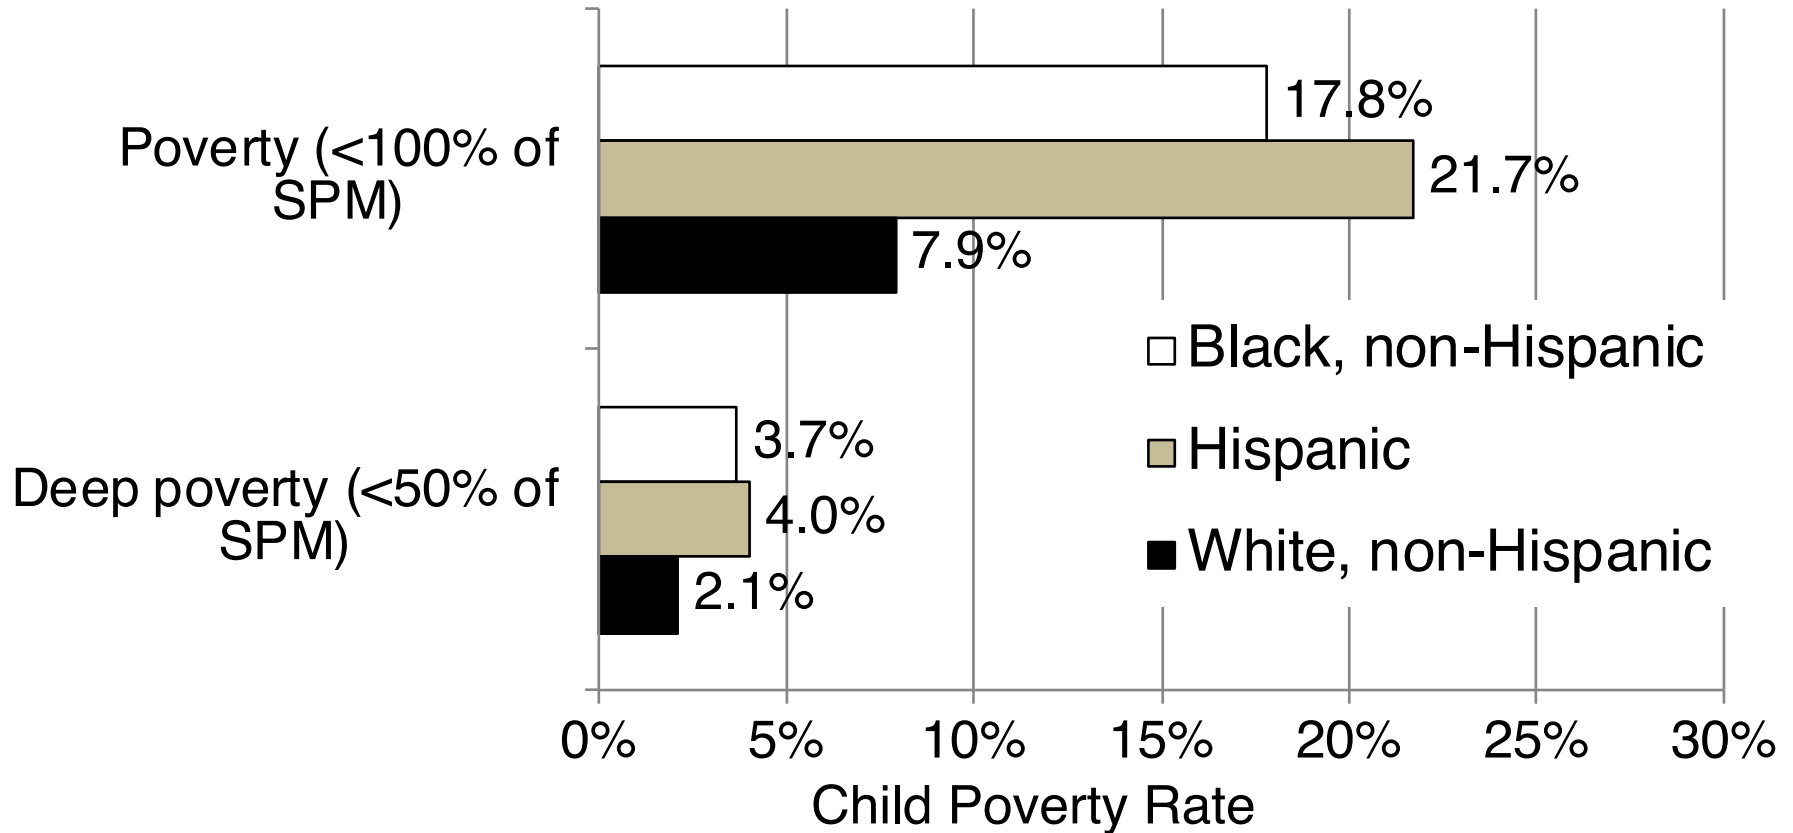

Bundling work-oriented and income-support programs can reduce poverty AND increase employment

A 50% Reduction in Child Poverty is Achievable

- The U.K. cut its child poverty rate in half from 2001-2008
- Canada's Child Benefit program is on course to cut child poverty in half
- The US nearly cut its child poverty rate in half between 1967 and 2016

Subgroups and Context

Poverty Rates by Race/Ethnicity

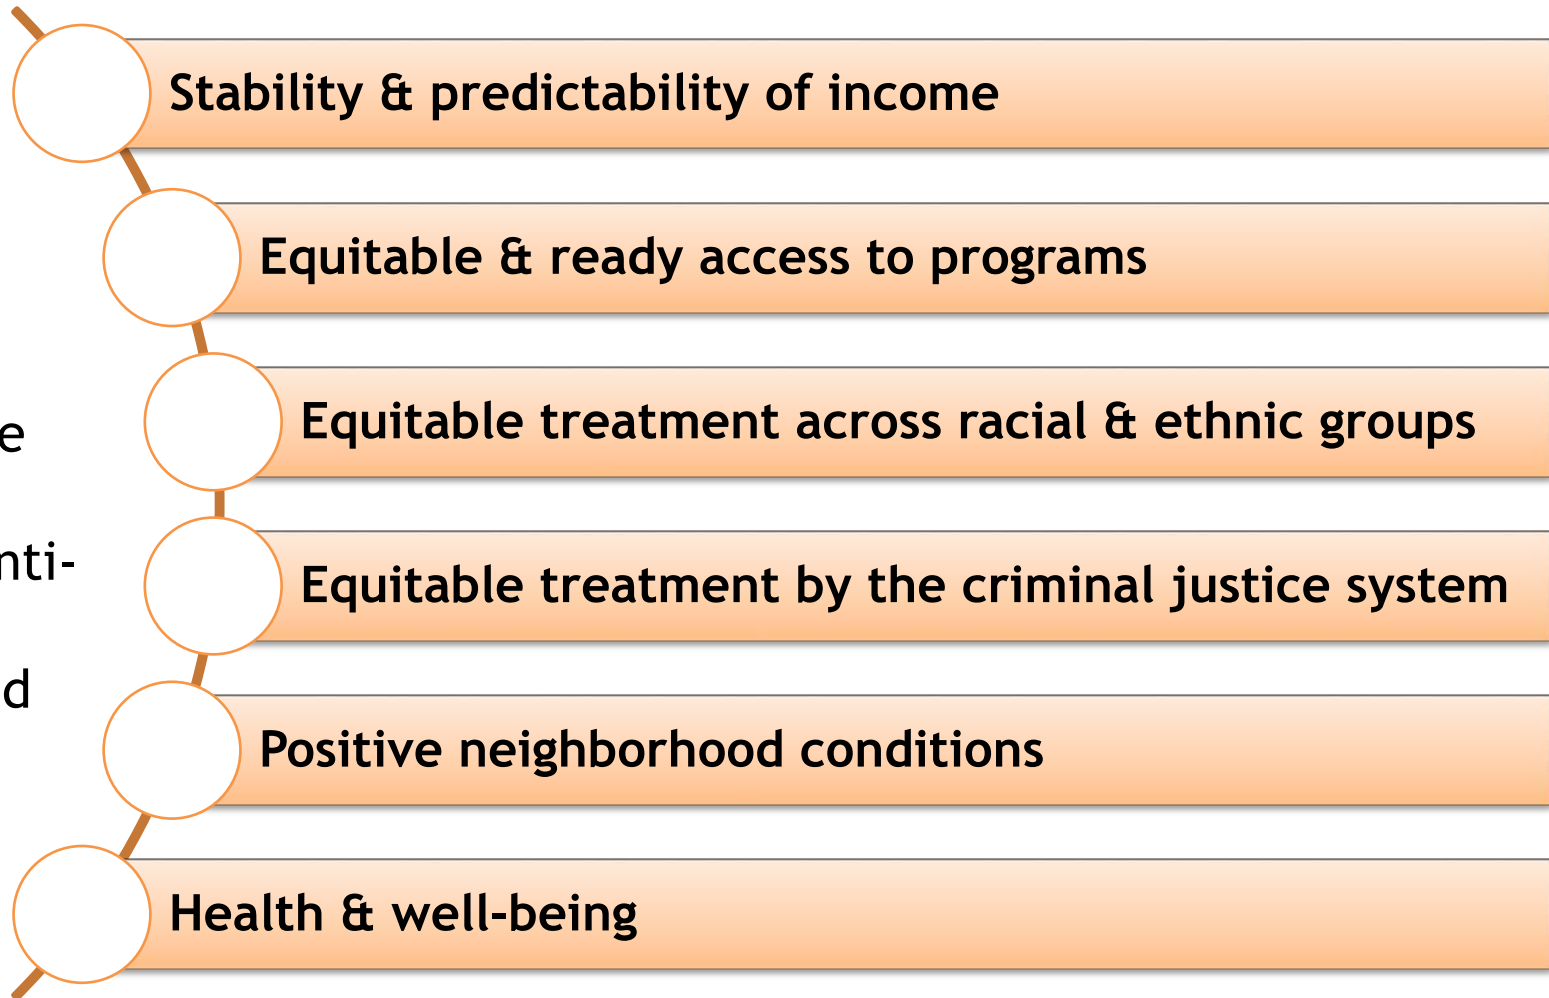

Poverty Shares by Race/Ethnicity

Contextual Factors

Context can greatly influence the impact and success of anti-poverty programs and policies.

Research Priorities and Next Steps

Research Priorities

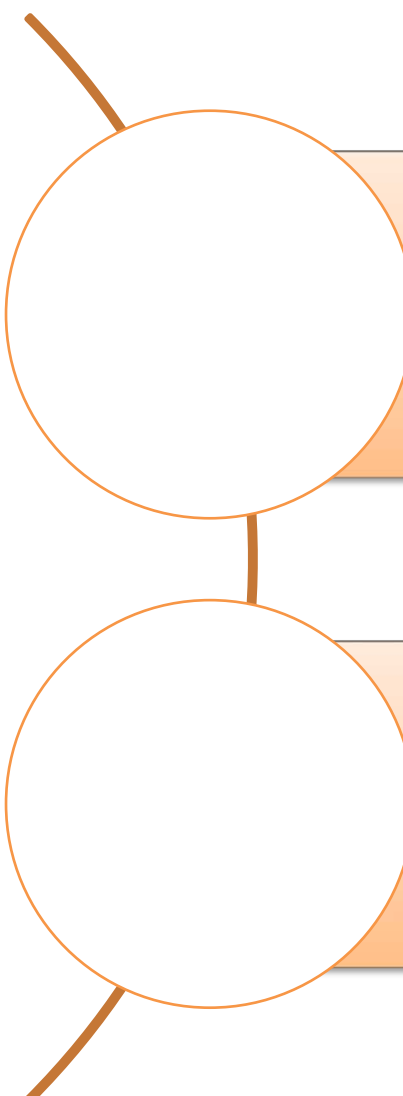

State and local waivers to test new work-related programs, supported by federal funding

More research on contextual impediments

Improve federal data on and measurement of poverty

Next Steps

Establish a coordinating mechanism to ensure that well-considered decisions are made on priorities for programs and policies

Ensure that the associated research and data needed for monitoring, evaluating, and further improvement are supported
